The following are some “student-safety rules” ☺ for our beginner students. Each student is asked to obey them as long as they are here at DBE, METU. One important rule is about attendance. Teachers take attendance every day, so students (1)__________________________ come to classes regularly. They have the right to be absent for 60 hours in a term. In other words, they (2)__________________________ go on sleeping, go to the cinema or do something else on some school days, but there is a limit. They (3)__________________________ be absent for more than 60 hours without a medical report. If they do not obey this rule, they fail.

The second rule is about being on time on mid-term days. Mid-term dates and times are announced in advance. On exam days, a student (4)__________________________ be at school on time to take the exam. This rule is also very important because if he / she is late, the teachers do not let him / her in, and the student misses the listening section of the mid-term.

We also have some advice for our students. They sometimes hear from other people that it is impossible for beginner students to pass the proficiency exam. This is wrong. Our advice is this: our students (5)__________________________ listen to these people. Hard work is enough to be successful, and there have always been very successful beginner students here.

We also have some advice about our self access center (SAC). Our students (6)__________________________ go to SAC regularly and do some exercises. Regular work at SAC is very helpful. The center is full of reference books and dictionaries. Also, there are experienced teachers there, and they help our students with the difficult questions. This means, our students (7)__________________________ bring their own dictionaries or look for teachers. Everything that they need is ready for them at the center.
Most of us think that fast-food comes from the USA, but this (1)_______________________ completely true. Hamburgers and sandwiches (2)_______________________ an important part of the fast-food trend, and if you think that (3)_______________________ are American inventions, you are wrong.

The sandwich was the invention of an aristocratic Englishman (4)_______________________ loved playing cards. (5)_______________________ name was the Earl of Sandwich. How did he invent it? He felt very hungry (6)_______________________ a 24-hour card game. (7)_______________________, he was too busy and didn’t want to leave the table. He ordered his cook to prepare a quick meal for him. (8)_______________________ cook brought him two pieces (9)_______________________ bread with some beef between them. The Earl and his friends liked this meal a lot, (10)_______________________ the sandwich was born.
